Seminar Series: Research Colloquium

Date: Friday, March 31, 2017
Time: 10:30 – 11:20 a.m.
Location: GRIS 103

Speaker: Sunduz Keles
Affiliation/Organization: University of Wisconsin, Madison
Department of Statistics
Department of Biostatistics and Medical Informatics

STATISTICAL DATA INTEGRATION FOR GENOMIC AND EPIGENOMIC DATA

Abstract: My group works on high dimensional statistical genomics and epigenomics with a specific emphasis on data integration problems. In this seminar, I will present our statistical approaches for NGS read-level data integration for studying repetitive regions of the genome and data integration for genomewide-association studies.
