Statistician (m/f)

Berlin, Germany

Bayer

Your tasks and responsibilities

• Collaborate with representatives from other functions to plan and execute relevant clinical studies in the role of a study statistician (m/f)
• Lead virtual cross-functional sub-teams within Data Sciences&Analytics
• Implement standard processes for the analysis of routine clinical studies
• Develop the statistical analysis plan for the clinical study as appropriate
• Facilitate the overall organization and coordination of statistical activities for a specific clinical study
• Assume responsibility for the production and accuracy of the statistical analysis and interpretation of the results of clinical studies
• Work independently at routine and more complex statistical questions and tasks
• Oversee and ensure accurate and timely delivery of statistical work outsourced to external providers

Who you are

• PhD or MS in biostatistics, statistics or mathematics
• Good knowledge of statistical programming languages (including SAS)
• Strong communication skills and ability to work both, independently and collaboratively, as required
• Being open-minded and challenging the status quo
• Fluent in English both written and spoken
