Statistical Epidemiologist

National Perinatal Epidemiology Unit, Old Road Campus, Headington, Oxford OX3 7LF

Applications are invited for the full time post of Statistical Epidemiologist at the National Perinatal Epidemiology Unit. The post is funded by the Medical Research Council until 30th June 2020 and is based at the University of Oxford’s Old Road Campus site.

We are looking for a self-motivated epidemiologist or statistician to analyse large and complex datasets in the area of child health and school-related outcomes, write up the results for scientific publications and present them at external meetings. You will need to enjoy working as part of a multi-disciplinary team in a fast-paced research environment, and have an interest in research that seeks to improve the care provided to women and their families during pregnancy, childbirth, the new-born period and childhood.

You must have an MSc degree, or higher, in epidemiology, medical statistics or a health-related science, or substantial experience demonstrating an equivalent level of knowledge and expertise. You will need to have experience of using regression modelling, ideally using Stata, for data analysis as well as the ability to accurately write up research findings. Excellent communication and organisational skills are also essential.

For an informal discussion about the post, please contact Maria Quigley (tel: 01865 289725, email: maria.quigley@npeu.ox.ac.uk).

Closing date for applications is 12 noon on Wednesday 17th April 2019. Interviews will be held on Thursday 2nd May 2019.

Applications for this vacancy are to be made online. You will be required to upload a CV and a supporting statement as part of your online application.

Closing Date : 17-Apr-2019
