Statistician, Do-it Trust

Birmingham, UK

About the opportunity

Making researches

- Determining the kind of information we need / angles
- Collecting these data from different sources (people, organisations, internet, newspaper …)
- Organising the repertory so we can find easily those data

Analysing data

- Analysing the data collected
- Presenting results so that ordinary people can understand them and read them easily (charts, tables, infographics, …)
- Writing reports and articles for publication (newspaper, website, etc.)

Monitoring data

- Creating a table (Excel) that helps us monitoring the data collected
- Updating / enhancing the table every 3 months

Leadership – Management

- Organising and managing volunteers to carry out researches
- Writing the user guides

About Birmingham Youth Empowerment Project CIC

Birmingham Youth Empowerment Project works to inspire, motivate and empower children and young people in Birmingham and the West Midlands. Through mentoring, education and intervention programmes we aim to build self-esteem and quality of life, laying the foundations for a healthy transition into adulthood.

Our vision is to be a dynamic and engaging arena that inspires children and young people to be active community members and productive, responsible citizens.

What are they looking for?

Strong analytical and IT skills
Interpersonal and communication skills
