Lecturer in Actuarial/Financial Mathematics
Leeds, UK

The University Of Leeds

Do you have a proven ability to carry out teaching and research in Financial Mathematics or related topics?

The School of Mathematics invites applications from academics who have an excellent research record, an aspiration to obtain external research funding and a passion for delivering first-class inspirational teaching and supervision in a top School (in the top 10 in REF2014) in a research-intensive UK University.

As Lecturer, you will carry out research, teaching and management within the school, faculty and university and contribute to academic leadership in the field of Statistics with specific emphasis on Actuarial or Financial Mathematics.

With a vision and drive to develop a prestigious internationally competitive research portfolio as well as a passion for undertaking research-led teaching you will make a significant impact on the performance, stature and profile of research and student education at the University of Leeds. You will have a PhD (or equivalent qualification) in a relevant field, a proven record of teaching in a University environment, and outstanding post-doctoral research experience in a relevant subject area. It is expected that you will join the research group in Probability, Stochastic Modelling and Financial Mathematics.

The Faculty of Mathematics and Physical Sciences holds the Athena SWAN Bronze Award in recognition of our success in recruiting, retaining and developing/promoting women in Science, Engineering and Technology (SET). The School of Mathematics also offers a number of family-friendly employment practices that are designed to enable a good work-life balance.
