Clinical Trial Statistician

University of Reading, Reading, UK

Employing unit: Thames Valley Clinical Trials Unit

SRF number: 23085

Reference number: SRF23085

Post type: Full-time, Fixed term Full-time or part time (min 0.8 FTE), 36-month fixed term in the first instance

Hours per week: 35

Grade: 6

Salary notes: £29,799 – £38,833 per annum

The Thames Valley Clinical Trials Unit (TVCTU) is a unique and exciting collaboration between the University of Reading, the Royal Berkshire NHS Foundation Trust and the Berkshire Healthcare NHS Foundation Trust, who have a history of working together to deliver high quality research. The TVCTU has been created to drive a significant step change in clinical research capability within the Thames Valley and our goal is to provide real benefits to patient health and wellbeing, as well as raising the profile of health-related research across the region.

We wish to develop a strong Statistical team and the post of Clinical Trial Statistician is an excellent opportunity for a strong candidate who wishes to develop their skills and be involved with the development and evolution of the TVCTU as the team grow. It is ideally suited for a newly qualified graduate, keen to gain a wider experience of clinical research or an individual with experience of statistics in clinical research looking to develop their skillset.

Working under the guidance of the Lead Clinical Trial Statistician, the Clinical Trial Statistician will support the development of high quality research proposals for the TVCTU by providing statistical advice and support in the validation, analysis, reporting and publication of data collected for clinical trials, and contribute to the design and set up of future studies. There are further data management aspects to the role (full training provided).
You will have:

- MSc/PhD in a statistical discipline.
- Excellent interpersonal and communication skills – able to explain statistics to non-statisticians.
- Ability to use IT systems and software appropriate to the role.
- Data management skills.

For an informal chat in regards to this role, Hayley Perry, Lead Clinical Trial Statistician, TVCTU on +44 (0)118 378 6435 or h.c.perry@reading.ac.uk or Ben Thompson, Interim Executive Director, TVCTU on +44 (0)7712 855310 or b.thompson@reading.ac.uk
