Data Analyst

Public First

London

22 days remaining

Ref: DataScientistJobs

Public First is a new consultancy that helps organisations change public policy and improve their reputations.

We take an analytical approach to organisational challenges, deploying economic modelling, data analysis, behavioural psychology and opinion research to shape effective policy, strategy and deliver communications with impact. We work with some of the leading organisations in the world on topics including AI, welfare policy, recycling, Industrial Strategy and education.

We are currently looking to expand our growing data analysis team. As part of this team, you will help:

- work with our research team to develop new policy proposals that can solve today’s challenges
- build our impact measurement practice, exploring how we better benchmark the wider impact of different organisations
- support our new polling and opinion research practice

The right candidate will have:

- Strong proficiency in Excel
- Creativity and the ability to develop new modelling strategies
- The ability to rapidly learn and self-develop
- Demonstrated interest in policy issues

Also desirable would be:

- Significant past experience in quantitative modelling or STEM postgraduate degree
- Proficiency in R, Python or STATA
- Experience with measuring economic and/or social impact
- Strong written communication skills

The position is a full-time role, based in our offices in Westminster. We pay competitively.

To apply, please send a copy of your CV and two samples of your work to jonathan@publicfirst.co.uk by Monday 4th February

Short listed candidates will be expected to complete a short test.
