The Max Planck Institute for Demographic Research (MPIDR) is recruiting a **statistical programmer** to work on a diverse set of projects spanning from health and ageing to fertility and forecasting. The successful candidate may have background in statistics, computer science, mathematics, or an applied discipline such as demography or economics or related field. Experience in using statistical software, analyzing large datasets, and collaboration with research teams are desirable.

The statistical programmer will join the Population Health Research Group that is led by the Director of the MPIDR Mikko Myrskylä. Our team members use mostly Stata, R and MATLAB and experience with at least one of these environments is a clear advantage. The position is initially for 3 years, with possibility for extension.

Interested applicants should provide:

1. Letter of Interest (max. one page)
2. Curriculum Vitae
3. Contact information for 2 references

Please apply online at [http://www.demogr.mpg.de/go/programmer](http://www.demogr.mpg.de/go/programmer). For inquiries about the position please contact Daniel Schneider at schneider@demogr.mpg.de. Applications are accepted on a rolling basis until the position is filled.

The MPIDR is a leading institute in demographic research hosting a diverse range of labs with interdisciplinary topics. The working language of the MPIDR is English. For more information about the MPIDR, please see [www.demogr.mpg.de](http://www.demogr.mpg.de). The Max Planck Society wishes to increase the share of women in areas where they are underrepresented, and strongly encourages women to apply. The Max Planck Society is committed to employing more individuals with disabilities, and especially encourages them to apply.
