Post-Doctoral Fellowship in Cancer Biostatistics at the University of Michigan

The Department of Biostatistics and Center for Cancer Biostatistics invite applications for post-doctoral fellowships emphasizing statistical methods development and applications related to cancer research. Areas of research include but are not limited to analysis of gene-environment interactions, risk prediction models, electronic health records and personalized prevention and treatment. Candidates considered for this position will be expected to be engaged in several ongoing projects at the University of Michigan Comprehensive Cancer Center.

Generous salary support is available for two years with potential for renewal in the third year. Applicants should have a doctoral degree in Biostatistics, Statistics, Mathematics, Human Genetics, Computer Science, Epidemiology, or other relevant discipline and should have demonstrated ability to conduct independent methodological research. Applicants should send CV, academic transcripts, and statement of research interests, and have at least three letters of reference sent to: Bhramar Mukherjee (734-764-6544, bhramar@umich.edu) and Jeremy MG Taylor (734-936-3287, jmgt@umich.edu), Department of Biostatistics, School of Public Health, University of Michigan, 1415 Washington Heights, Ann Arbor, Michigan 48109-2029.

Applicant review is ongoing and will continue until positions are filled. The University of Michigan is an affirmative action/equal opportunity employer. Women and minorities are encouraged to apply.

The Department of Biostatistics has 38 faculty members and approximately 150 full time graduate students. The Center for Cancer Biostatistics includes faculty and students from Biostatistics and Epidemiology conducting diverse cancer research projects in collaboration with investigators from the Medical School, Institute of Social Research, Institute of Health Policy and Innovation and other units on campus. The University of Michigan offers competitive salaries and excellent benefits. Ann Arbor is a progressive city of about 118,000, with excellent schools and a wide variety of sports and musical activities. It is rated very highly in national surveys for quality of life and has the amenities of a city many times its size.
