Associate Director, Biostatistician

Darmstadt, Germany

Merck

Merck is a leading science and technology company in healthcare, life science and performance materials. Around 50,000 employees in 67 countries work to further develop technologies that improve and enhance life – from biopharmaceutical therapies to treat cancer or multiple sclerosis, cutting-edge systems for scientific research and production, to liquid crystals for smartphones and LCD televisions.

Your role: You will be a lead statistician for a development project within immune-oncology. This includes managing timelines and resources. Besides translating problems into mathematical forms you use state-of-the-art modeling techniques to provide solutions. You will interact with clinical and project teams and provide statistical/technical advice for drug development.

Who you are:

- PhD or M.Sc. in Statistics, Biostatistics or a related discipline
- Preferably at least 5 years’ experience in clinical development, within the pharmaceutical industry or at a university institute related to the field
- Experience of appropriate software packages, such as SAS or R, is important
- Excellent project management and communication skills
- Able to work effectively in international teams, effectively operates within a matrix organization and with multi-disciplinary groups
- Self-directed and a recognized leader with a strategic perspective

What we offer: Your possibilities to develop in our growing company are just as manifold as our product portfolio. We offer a modern and international working environment to unleash your innovative potential in diverse teams, and take responsibility for our employees, products, the environment and society.
