The Department of Internal Medicine at the University of New Mexico Health Sciences Center invites applicants to apply for an open faculty position in Epidemiology, Biostatistics, and Preventive Medicine. This position is at the Professor Rank, Tenure Track and will support research programs in the Department and the Health Sciences Center.

The successful applicant will engage in both independent and collaborative projects and will be expected to maintain his/her own methodological research program. The successful applicant will have a leadership role in the development of biostatistical resources for the Department and potentially have a similar role in the Cancer Center, the Clinical and Translational Science Center, the Kidney Institute of New Mexico or other research centers.

This position may be subject to a criminal records screening in accordance with New Mexico law. Minimum Qualifications: (1) PhD or equivalent degree in Statistics, Biostatistics or a related field; and (2) Candidate must be eligible to work in the US. (this is not J1 Visa opportunity).

Preferred Qualifications: Desirable/Preferable qualifications include expertise in at least one of the following areas:

(1) Applied Statistics, Biometrics/Biostatistics, Mathematical Statistics;
(2) Demonstrated ability to work in a team science framework and to develop collaborations with health science investigators;
(3) Record of development of independent research including development or implementation of biostatistics methods in sciences, policy research, clinical trials, and or utilization of large medical databases;
(4) Leadership of biostatistics cores or resources;
(5) Teaching and/or mentoring experience in biostatistics.

Strong preference will be given to applicants with expertise and experience in multiple areas.
