Associate Professor or Professor of Biostatistics

St. Luke's International University Graduate School of Public Health
Tokyo, JAPAN

22 days remaining

Main Duties and Responsibilities

- To contribute to St. Luke’s unique identity as an international university with an interdisciplinary culture and growing graduate programs.
- To show strong interest and skills in teaching and research in areas of public health and Biostatistics.
- To teach core courses in his or her own discipline at the graduate (master’s and doctoral degree) level.

The typical teaching assignment is courses/seminars per week during the semesters, alongside correspondingly reasonable expectations for scholarship, mentoring, and service.

To be a passionate teacher, a committed mentor, and produce the highest quality scholarship.

To engage in creative teaching methods, produce strong research, possess excellent communication skills in English (and Japanese preferred), be a devoted mentor for students and colleagues, and provide service to the institution.

This job description provides a framework for the role and it may be necessary for Professors and Associate Professors to undertake any duties commensurate with the post as might reasonably be required.

Person with proper academic and research background and special knowledge/achievements in this field, corresponding to the following items:

- The applicant must have a doctoral degree
- The applicant must show excellent educational achievements in this field
- Be able to lecture and provide supervision in this field through English language medium.
