Medical Statistician

Durham, United Kingdom

You will support the activities of the NIHR Research Design Service North East (NIHR RDS NE) providing specialist advice in statistics within the NIHR RDS NE team for investigators from the NHS and Higher Education Institutions across the region who are preparing applications for national peer-reviewed funding (to NIHR, AMRC, MRC and other national funding bodies) for applied health and social care research. You will be required to work across the region at Durham University’s Queens and Durham Campuses; Newcastle University and NHS trusts within the North East region.

You will also support other health projects within the School and The Wolfson Research Institute, Durham University’s interdisciplinary institute for research on health and well-being. You will develop your status as an active researcher, developing a growing reputation within your research field; initiating and taking responsibility for research projects, developing new methodologies to solve health related problems. This will include support and development of the research portfolio within Durham Clinical Trials Unit (DCTU) as well as contributing to and helping to develop methodological portfolio with the School of Medicine, Pharmacy and Health, and the Wolfson Research Institute.

Regular regional travel to clinical, University and other sites is a feature of this role.

Applications are particularly welcome from women and black and minority ethnic candidates, who are under-represented in academic posts in the University.
