(Tenure-track) Associate Senior Lecturer in Medical statistics

Job ID reference: PAR 2018/166
Institute of Medicine, University of Gothenburg, Sweden
Apply by: April 9, 2018

Apply here

The Health Metrics unit is the co-ordinating unit for teaching and research in biostatistics, epidemiology and health economics at the Sahlgrenska Academy (medical faculty) at the University of Gothenburg in Sweden. The research at the unit is normally applied to clinical data and register data. To read more about the unit please go to www.healthmetrics.gu.se

Subject area: Medical statistics

Subject area description: The Health Metrics unit’s teaching and research is focused on the analysis of clinical data as well as registry data for various applied health science and medical research questions.

Job assignments: The tasks include undergraduate and post graduate teaching as well as research related to ongoing projects at the unit.

Eligibility: Qualified for appointment as associate senior lecturer is a person who has been awarded a PhD degree in statistics, mathematical statistics or a PhD in medicine if the thesis has a methodological focus and the applicant has a master in statistics or mathematical statistics. Priority should be given to candidates who have been awarded a PhD or achieved equivalent academic qualifications no more than seven years before the application deadline. Candidates who graduated earlier may also be given primary consideration if there are special reasons. Special reasons are considered to be a leave of absence due to illness, parental leave for example. Reason, dates and extent must be clearly specified in the application and verified with the relevant documentation.

Assessment: Experience in statistical teaching at a university level. Scientific skills and pedagogical skills will be weighted equally. In assessing the scientific skills, documented methodology relevant to health research will be of particular importance.
Knowledge in SPSS, SAS, Stata and R is meritorious. The candidate is expected to teach in English. Knowledge in Swedish language is a merit, but not necessary.

**Employment:** The employment is a full time temporary post for up to 4 years and is located at The Institute of Medicine. First day of employment is by agreement. After 4 years it is possible to apply for a tenured position as Senior Lecturer in Medical Statistics (similar to Associate Professor). **How to apply**

In order to apply for a position at the University of Gothenburg, you have to register an account in our online recruitment system. Applications must follow the layout of the recommendations for the Sahlgrenska Academy for applications for teaching positions: https://sahlgrenska.gu.se/english/co-worker/service-support/teacher-recruitment/electronic-application/general

It is the responsibility of the applicant to ensure that the application is complete in accordance with the instructions in the job advertisement, and that it is submitted before the deadline. The selection of candidates is made on the basis of the qualifications registered in the application.

The application is to be written in English.

Please note in particular that the following documents must accompany the application:
- PhD degree (in Swedish or English)
- A maximum of 10 selected scientific publications that the applicant want to refer to (in full text)
- If applicable, specification concerning deductible time
- Other certificates / degrees / diplomas proving the qualifications

The reference number of the application, PAR 2018/166, should be clearly stated when mailing complementary documents.
