Data Analyst, BAE Systems
Portsmouth, UK

Would you like to be part of a new team within BAE Systems and help shape the future of the company? We currently have a number of vacancies at various levels for Data Analysts at our site in Portsmouth.

As a Data Analyst, you will be analysing business data and investigating interesting insights and correlations. You will work to help us improve our diagnostic and prognostics capability for a range of equipment and services, through analysing this data.

This role will offer excellent opportunities to grow and develop a new team within the business, with the potential for excellent career progression. You will also have the chance to become one of the only defence industry experts, through developing specialist knowledge within a specific area of the business.

**Your main responsibilities as a Data Analyst will involve:**

- Analysing data from within the business, from vibration sensitivity on ships to HR and finance information
- Using data to create predictions and turn this into business insight
- Research and implement new tools and new data
- Writing reports and presenting information
- Creating insights, theoretical testing and metrics

**Your skills and qualifications as a Data Analyst:**

- Experience in data analysis
- A good mathematical understanding
- Experience in Excel, MatLab, Mathematica or other business analytics tools
- An understanding of business data
- A degree within Mathematics, Business Analysis, Computer Science, Engineering or other relevant field (or equivalent qualification or experience) is desirable, but not essential

**What we’re looking for in you:**

You will be a self-starter with a diagnostic and prognostic appreciation to your day-to-day work. You will be able to drive the team forward with excellent communication skills, both verbal and written. You will also have the ability to find alternative and interesting solutions and challenge ideas when required.

**Salary:** Competitive

**Location:** Portsmouth

BAE Systems
BAE Systems is one of the world’s leading global defence, security and aerospace companies. We work at the cutting edge of technology, creating more than 100 new inventions every year for customers in over 100 countries.

**Maritime Services**

£50bn of 70bn of UK government spend in next 20yrs will be on Maritime programmes. Come and join BAE Systems and help define the future of global maritime defence capabilities. From our headquarters in Portsmouth, BAE Systems Maritime Services delivers end to end support to over 50 per cent of the Royal Navy’s Surface Fleet. Our services include ship upgrades, repairs, dockyard facilities management and provision of combat systems training. We also develop and support the Royal Navy’s complex equipment, such as radar, torpedoes and small boats. The 2016 arrival in Portsmouth of the Queen Elizabeth Class Aircraft Carrier demands a significant capital building programme as we reconfigure the dockyard and prepare our teams to support these iconic ships. With approximately 3,500 employees based at five UK locations and a revenue of £650 million we are proud to support the Royal Navy in global operations.

We pride ourselves on employing the best professionals around and offer significant opportunities for committed employees to learn and grow with us. Join us and you’ll be part of something important; something you can be proud of.

You’ll find we offer a wealth of career options. With our international programmes and core support to UK MoD Maritime including Queen Elizabeth Class, Type 45 Destroyers, Spearfish Torpedo and Radars, the projects you’ll be involved in will form the backbone of the Royal Navy for decades to come.

**BAE Systems welcomes applications from all sections of the community.**
