Associate - Data Analytics

Alvarez & Marsal
London EC2M 7EB
Ref: 201900464

Apply

Alvarez & Marsal (A&M) is a privately held, owner-operated, global advisory firm well known for its heritage in corporate restructuring. A&M prides itself on providing radically effective advice and highly experienced, hands-on support to organisations facing significant operational and/or financial challenges – situations that demand action, objectivity and measurable results in both the short and longer term.

Our Data Analytics team has experienced unprecedented growth & an opportunity exists for an ambitious individual to join as an Analyst or Associate.

Overview of the role

The candidate will work within A&M Client teams using innovative data analytical, interrogation & visualisation techniques.

Project Examples and Responsibilities

- Extract and analyze financial transactional data (e.g. loans, assets, trades, etc) to perform data quality assessment and perform loan exposure stress testing
- Analyze sales, marketing and financial business data across industries to identify opportunities for cost reduction and sales maximization
- Interrogation of AR/AP/inventory data to drive cost savings and inform business decisions
- Extract and interrogate sales and accounting data to perform compliance reviews and identify evidences of fraud, corruption and other anomalies
- Perform anti-money laundering investigations and compliance reviews
- Develop business intelligence / KPI dashboards for management reporting
- Big data and predictive analytics
Technical:

- Data interrogation & analysis of large datasets i.e. working in Access/SQL server/ACL/SAS/Oracle.
- Tableau/Qlikview for data analysis & visualisation, building dashboards to help clients with management reporting & KPI issue
- Intermediate to advanced proficiency with Microsoft Access/SQL & Excel
- Programming experience in VB, R, command-line scripting or similar is a plus
- Statistical or econometrics knowledge is also welcome.

Non-Technical:

- Good interpersonal & relationship building skills
- Experienced as a management consultant with the drive and ambition to lead projects and business cases
- Thrives in a fast-paced, challenging, & unpredictable environment
- Fast learner, eager to learn new technologies
- The successful candidate will join a growing team with strong leadership, bright, energetic people & a truly entrepreneurial spirit.

The ideal candidate will possess the following:

- Strong academic track record including a degree from a leading university
- Experience with statistical and coding languages & tools including R, Python, Java, SQL, and Tableau
- Well developed client and presentation skills combined with a practical approach to problem solving
