Senior Teradata Engineer

Swindon, UK
73,436

Apply

• A Teradata Engineer in our head offices in Swindon
• Up to £73,436 a year on a permanent 35-hour per week contract
• Send in your application by 31st March 2019

Nationwide has recently launched a new data strategy which will transform the way the Society thinks about, values and manages its data. As part of this new strategy the data & analytics community, and more specifically, the data solutions team has a number of exciting new roles to help deliver on the promises of reducing the number of legacy data stores, simplifying the architectural landscape and treating data as a valued asset.

This role will focus on delivering reporting and analytical solutions onto the society’s enterprise data platform (Hadoop big data ecosystem and Teradata appliance) in support of both small Agile and larger scale project and user delivery.
Combining responsibilities for technical delivery alongside continuous improvement, innovation and automation, this exciting new role will provide the opportunity to work with some cutting-edge technologies.

What you'll be doing
Reporting to a Snr Data Engineer, you will form a key part of a team of engineers responsible for the implementation of data solutions onto the new IM estate in support of our strategy objective of simplifying our data landscape and delivery of insight and innovation. Working directly with business and IT stakeholders you will help to deliver best practice, innovation and automation in the industrialisation of complex strategic IT initiatives alongside smaller user driven demand.

You will bring a high level of motivation and innovation to the team, always looking for ways to expand your own skill set and searching for ways to do things better, quicker & cheaper.

Who we're looking for
As a minimum requirement you’ll:

• Have at least 1 years’ experience of data lake and/or data warehouse delivery with:
  o Either, experience in the Hadoop big data platform and a broad range of associated technologies, such as Python, R, Spark, HIVE, Scala
  o Or, experience in data warehouse delivery, ideally with a mix of Informatica and/or Teradata technologies
• Be a technical innovator with a curious mindset and a thirst for knowledge and be able to demonstrate a drive for continual improvement
• Be a strong team player who enjoys and thrives on collaboration across colleagues and teams
• Have excellent stakeholder management and influencing skills

It would be nice if you also had:
• Experience of working in an Agile environment using SCRUM/Kanban
• Hands-on experience of working within a DevOps environment with tooling such as Jenkins, Docker, Cucumber etc

The extras you'll get

If you put a lot in, it’s only fair you should get a lot out. So if you help us do the right thing for our members, we’ll help further your career with us.

As part of our team you’ll get:
• Access to training to help you progress and develop your technical skills and career
• Pension scheme where if you pay in 7% we’ll top it up to 23%
• Life assurance worth 8x your salary
• 24 days’ holiday plus bank holidays
• The ability to ‘buy’ up to 10 days more holiday
• Flexible benefits scheme giving you access to discount vouchers at various retail outlets
• Access to a Healthcare scheme
• Access to an annual performance related bonus scheme
