Statistical Programmers – CEE, Chiltern International

Fed up of your current role? Looking for an exciting new role, offering great career progression and a wide range of benefits? This is a fantastic opportunity and a very pleasant working atmosphere within an expert team of individuals, a role that allows this individual to see a direct impact on the growth of the company from their day to day work.

Job Background

Chiltern is a well-established privately owned full service (Phase I-IV) Clinical Research Organization.

Due to our continuing success and expansion, we are currently looking for statistical programmers to work with our team in CEE – Poland, Czech Republic, Hungary, Ukraine, and Russia. Full time, permanent roles, office or home based.

Duties & Responsibilities

Responsibilities:

Provide lead statistical programming support in the project specific programming of statistical tables, listings, and analysis datasets for clinical trials in accordance with Chiltern and/or sponsor Standard Operating Procedures (SOPs) or study specific guidelines.

Requirements

PREFERRED SKILLS:

- Undergraduate degree or higher in Biostatistics, Computer Science, or related field
- Knowledge of one or more statistical software packages (SAS® preferred) used to conduct statistical analyses
- Good verbal and written communication
- Previous experience in a pharmaceutical research or CRO setting required
- Positive attitude and willingness to learn and contribute in a team setting
- A satisfactory combination of education and experience may be accepted as a substitute for the specific education and experience listed above

Additional Information:

For an informal and confidential discussion, please phone Magdalena Mirowska on +44(0) 1617900813. Alternatively you can email me at Magdalena.mirowska@chiltern.com
