POSTDOCTORAL RESEARCH ASSOCIATE, PUBLIC HEALTH, PHOENIX AZ.

The Department of Epidemiology and Biostatistics at the University of Arizona welcomes applications for Postdoctoral Research Associate I. This is a 2-year postdoctoral position with an anticipated appointment beginning ASAP.

The successful candidate will be working closely with domain experts and stakeholders from different departments. In particular, the candidate will have the opportunity and expectation to work in transdisciplinary teams with researchers in statistics, endocrinology, and epidemiology, as well as with domain scientists and industry.

The candidates will apply biostatistics, statistics and cutting-edge machine learning techniques to Veterans Affair’s electronic medical record data, genomic biobank data, and large-scale clinical trials. The candidate needs to have exceptional computing skills and the ability to bridge the gaps between scientific endeavors and real-world applications. There will be no teaching commitment. The work will be carried out at the University of Arizona and Phoenix VA, in Phoenix, Arizona. The position is available initially for 1 year, with the possibility of extension for another 1-year dependent upon performance.
