Statistician / Senior Statistician (Health Services Research)

Singapore

The Ministry of Health’s (MOH) vision is to champion a healthy nation with our people – to live well, live long and with peace of mind. As an open country constantly exposed to an interconnected world, Singapore faces complex issues in public healthcare. MOH constantly grapples with new challenges brought on by an increasingly globalised world, a rapidly ageing population and rising expectations. MOH’s responses to these challenges include preventing and managing the outbreak of diseases such as SARS and Influenza A (H1N1), designing a healthcare system that delivers care in an integrated and effective manner, growing the capacity and capabilities within the sector, and managing healthcare inflation.

As an MOH officer, you will be involved in formulating and implementing policies that guide Singapore’s healthcare ecosystem. You will work alongside a team with varied skills and backgrounds, but with the common goals of (i) promoting good health and reducing illnesses; (ii) ensuring that Singaporeans have access to good and affordable healthcare; and (iii) pursuing medical excellence. Your work will have far-reaching impact on the health and lives of Singaporeans.

Responsibilities

You will provide evidence based policy making for good and affordable health services that is appropriate to needs through formulating, generating and publishing meaningful statistics from health services research and evaluation projects.

Requirements

- Degree in statistics, biostatistics or related discipline
- Working experience in health statistics, health services research or public health-related work will be advantage
- Knowledge in at least one statistical software, SPSS, STATA, SAS or R
- Good oral and written communication skills, adept at use of presentation packages such as MS PowerPoint
- Strong analytical skill, integrity, tenacious, meticulous with a keen eye for details, good time management, able to work independently and also in collaborative and interdisciplinary teams, and a passion to improve the performance of the Singapore healthcare system through evidence-based health policies

If you are shortlisted for the position(s), you should hear from us within 30 days of the closing date of the advertisement.

Applications close: 21 Apr 2016
