The University of Iowa’s College of Dentistry is conducting a search for a Director of the Biostatistics Unit. This is a full-time tenure-track faculty position in the Iowa Institute for Oral Health Research.

**Major responsibilities include:** direct the Biostatistics Program in the College of Dentistry. Collaborate with investigators in development and execution of clinical, basic science, and translational research and its dissemination, with involvement in research, teaching, mentoring, and service. Provide leadership, fulfill administrative responsibilities within a collaborative biostatistical unit, and serve as collegiate resource. The position is available June 1, 2017; screening begins immediately.

**Applicants must have:** Ph.D. in Biostatistics, or Ph.D. in Statistics with significant emphasis in biomedical applications; established track record of independent and collaborative research; history of effective conduct of research as part of a multidisciplinary team; demonstrated evidence of effective teaching; supervisory experience; and demonstrated experience working effectively in a diverse environment.

**Highly desirable qualifications include:** excellent written and verbal communication skills; effective interpersonal skills; effective biostatistical consulting skills; experience participating in externally-funded grant projects; experience teaching health science students biostatistics and research design; experience mentoring student research; professional/scholarly growth commensurate with duration of experience; and strong record of scientific publication and presentation at professional meetings.

**Desirable qualifications include:** experience mentoring junior faculty; and knowledge of dental nomenclature and classification. Academic rank and salary will be commensurate with qualifications and experience.
