Postdoctoral Trainee – University of North Carolina at Chapel Hill, Department of Biostatistics

The Department of Biostatistics at the University of North Carolina at Chapel Hill seeks to fill one post-doctoral position on its training grant in environmental biostatistics.

The Department has numerous exciting research programs of relevance to environmental health science, including focus areas in genomics and big data, and the postdoctoral scholars funded by this grant span the three disciplines of biostatistics, environmental health science, and environmental epidemiology. The Department is a center of cutting-edge research in statistical science with strong collaborative relationships within the UNC Gillings School of Global Public Health, ranked #2 nationally. Postdoctoral scholars funded on this grant are free to work with a wide variety of faculty members in biostatistics as primary mentors and to collaborate on research relevant to environmental health science with faculty members throughout the University.

The typical successful applicant has a strong quantitative background with a doctorate in biostatistics, statistics, or a related discipline.

Due to Federally-mandated funding restrictions, the post-doctoral trainee MUST be a US citizen or permanent resident.

The University of North Carolina at Chapel Hill is an equal opportunity and affirmative action employer. All qualified applicants will receive consideration for employment without regard to age, color, disability, gender, gender expression, gender identity, genetic information, national origin, race, religion, sex, sexual orientation, or status as a protected veteran.

Questions should be directed to Professor Haibo Zhou at zhou@bios.unc.edu.
