
A full year appointment carries a teaching load of 5 one-quarter courses per year. Departmental teaching includes upper-division undergraduate courses in probability, statistics, regression, time-series, design of experiments, and stochastic processes. Candidates with a background in financial mathematics (especially stochastic games, computational finance, commodity markets and systemic risk) and actuarial science (especially longevity modeling, and healthcare applications) are particularly encouraged to apply.

Applicants must demonstrate or show strong promise for undergraduate teaching, research and interaction with faculty at UC Santa Barbara. In particular, we seek applicants able to engage with in research in Statistics, our new research group in Data Science, or the Center for Financial Mathematics and Actuarial Research (http://www.pstat.ucsb.edu/cfmar/).

Qualifications: Have a PhD in Mathematics, Statistics, or related field by the time of employment.

Interested candidates should apply by submitting CV, a statement of current and planned research, a teaching statement, and have three letters of reference sent (at least one letter should describe teaching accomplishments). Also, submit the required cover letter.

The Department is especially interested in candidates who can contribute to the diversity and excellence of the academic community through research, teaching and service. Materials should be electronically submitted via UC Recruit: https://recruit.ap.ucsb.edu/apply/JPF01199

For primary consideration, complete all application requirements on or before February 4, 2018. Positions are open until filled.

The University of California is an Equal Opportunity/Affirmative Action Employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, or any other characteristic protected by law.
