Assistant Professor in Mathematical Statistics, Stockholm University

Stockholm, Sweden

The position belongs to the Division of Mathematical Statistics, Dept of Mathematics. The division staff consists of 10-14 teachers/researchers and 11 Ph.D. students, see web site http://www.math.su.se/english/

Subject description: Statistical theory and probability theory, and their applications, in particular natural sciences, medicine, finance and insurance.

**Main responsibilities:**

Research, and in addition some teaching and supervision.

**Qualification requirements:**

The applicant must have a doctoral degree or equivalent qualifications. Preference is given to those with a doctoral degree or equivalently achieved no more than seven years ago.

**Assessment criteria:**

In the appointment process, special attention will be given to research skills. Teaching skills will also be considered. The assessment of research skills will focus primarily on merits within the subject area of the position. A general assessment criterion is the ability to work with other people, as well as other general abilities required to perform one's duties.

**Additional information**

An assistant professor is employed until further notice, but no longer than four years. This may be extended to at most six years under special circumstances, such as due to sick leave or parental leave.

An assistant professor may, on application, be promoted to a permanent position as associate professor. Specific criteria for promotion can be found at www.science.su.se. An employee seeking promotion to associate professor is expected to be able to teach in Swedish.

Female applicants are particularly welcome, as most teachers at the department are men. Stockholm University strives to be a workplace free from discrimination and with equal opportunities for all.
