The Department of Mathematical Sciences at DePaul University invites applications for a tenure track position in statistics at the Assistant Professor level beginning September 2017.

DePaul is one of the nation’s ten largest private universities and one whose faculty priority is teaching. In addition to offering a broad array of mathematics and statistics courses at the undergraduate level, the department offers graduate programs leading to Masters Degrees in Applied Statistics and Applied Mathematics with seven different concentrations.

The department seeks candidates actively engaged in research and strongly committed to teaching. To be considered, candidates must have a Ph.D. in statistics, or alternatively a doctoral degree in a closely related field with significant coursework in statistics at the time of appointment. While all areas of statistics will be considered, preference will be given to candidates having expertise in longitudinal data analysis, data science, time series, experimental design, and actuarial science.

Applications must be submitted electronically to DePaul University at http://facultyopportunities.depaul.edu/postings/995 and at mathjobs.org and should include a cover letter, a curriculum vita, unofficial transcripts, statements of teaching and research philosophy, and three letters of recommendation, where at least one addresses the applicant’s teaching effectiveness. Applicants are also encouraged to supply additional information such as formal teaching evaluation summaries.

Review of applications will begin December 4, 2016 and continue until the position has been filled. Applications received by this date will receive full consideration.
