Data Scientist, YPlan

London, UK

The data team here at YPlan is looking for a Data Analyst to help us build the best events app in the world!

You will help us measure the effectiveness of our strategy, find out the answer to the unknowns of our business, and define metrics to determine our progress. Much of this work involves developing mathematical and statistical models in both code and theory. We are looking for a top notch statistician with real world experience to help design and manage models of our customers and our business.

**Responsibilities:**

Support self-serve analysis for the company by developing data cleansing pipelines

Provide statistical assistance to prevent data gotchas

Automation of common data analyses in R or python

Using statistics and data analysis to fill in gaps in our product and customer knowledge

If you think you are up to the challenge, we'd love to hear from you!

**Desired Skills and Experience**

- SQL, preferably MySQL
- Solid statistical experience
- Ability to work in a team
- Experience with automation of analysis

**Great to have:**

- R
- Python
- Looker

**Bonus round:**

- Data visulation
- Big data
- Knowledge of computational statistics and/or machine learning
