Postdoctoral Fellow, Statistician University of Canberra

Canberra, Australia

Would you like to work with leading organisations that have an international reputation for applied research and innovation in sport and exercise? If yes, then we want to hear from you!

This position spans research statistics at both the University of Canberra and the Australian Institute of Sport (AIS) and the successful applicant will be required to work at these two locations. There will also be a limited requirement to provide support to the University of Canberra’s Health Research Institute (HRI).

The successful applicant will support researchers from study design and analysis through to publication. Statistical support is needed in a number of diverse disciplines requiring a variety of statistical approaches. Disciplines include: Physiology, Biomechanics, Performance Analysis, Epidemiology, Physical Therapies, Medicine, Nutrition, Psychology, Design and Technology and Strength Science. This position offers the opportunity to work in the exciting and fast paced area of high performance sport that will enhance the profile of both the appointee and the University.

To be considered for this position your application must include your resume and responses to selection criteria.

The University is an EO employer offering excellent conditions and benefits including generous superannuation.

Aboriginal and Torres Strait Islander people are encouraged to apply.
