We have lots of ideas about how to successfully drive digitalization in companies. For example, with open cloud platforms, highly developed security systems, and clever tools for developers. What is your role in this? Move the world from behind the scenes with your IT expertise and passion for game-changing information technology. Rethink IT and steer projects in completely new directions. Be bold when others have been given up. We'll provide the resources you need to do this. We therefore offer a variety of opportunities to be involved in a global network of IT experts and professionals. Welcome to our world!

We make real what matters. This is your role.

• You interact with internal customers across Siemens as project responsible
• You support to take problems and the associated data and give the answers in a concise form to assist your customers in making business decisions
• Efficient and effective data management standards, access and controls the interests of Siemens and its customers
• You drive pragmatic approaches to solving business problems through using multivariate statistics, predictive modeling, machine learning, segmentation, optimization, recommendation engine development and other advanced techniques
• You are part of an inspiring team of sophisticated and pragmatic data scientists

Use your skills to move the world forward.

• You have longterm professional experience and a strong academic history (Degree in IT, Computer Science, Mathematics, Statistics or Physics)
• You have longterm experience in handling large amounts of data using various tools - all programming languages, especially R, Python, SQL and C#
• You have technical experience in a Data Analysis including knowledge of PP, FI, SD, MM, PS, CO and MIS reports, SAP is a plus
- Excellent technical communications and software modeling skills combined with strategic thinking and analytical capabilities
- You are fluent in English, additional language skills are a plus

We've got quite a lot to offer. How about you?
