Senior Data Scientist, Sainsbury’s

London, UK

Senior Data Scientist
£competitive + benefits
London – Holborn

Sainsbury’s is streets ahead of the retail industry in terms of digital innovation. Here at our centre of excellence in the heart of London, which is itself evolving as our business does, we’re crafting world-beating apps and services to delight our customers. And we’re recruiting and developing some of the most talented Digital & Technology professionals in the UK.

Right now, we’re looking for a Senior Data Scientist to source and analyse all kinds of data to tell articulate engaging stories using the results. The projects you work on will bring about the development of dazzling new applications and systems, turning your clever hypotheses into actual, real life solutions that wow our customers.

As a Senior Data Scientist you’ll:

- Support the planning and execution of Data Science projects
- Enable the development of amazing new applications based on your insights and algorithms
- Help create a production solution that facilitates our Business As Usual (BAU) team’s work
- Develop close working relationships with key internal customers and really raise awareness of Data Science

You’ll need:

- A postgraduate qualification or equivalent experience in pure mathematics, physics, statistics or similar
- Specialist ability to source and extract data at scale
- Brilliant analytical skills and the ability to turn your insights into powerful narratives
- The kind of people skills that will help you build great relationships with internal customers
- A level of self-motivation that sees you over-achieving on every project

As a level C5 colleague, you can expect:

- Car loan up to £10,000 or season ticket loan on public transport
- 10% discount at all Sainsbury’s stores and online shopping
- Sainsbury’s 7.5% Retirement Pension Plan
- Bonus scheme enabling you to earn an extra annual payment of up to 20% of basic salary
