An opportunity is available for a statistician to work with Professor James Wason in Newcastle University’s Biostatistics Research Group. This position will involve working on a mix of methodological research related to precision medicine clinical trials and to be the statistician for a range of newly funded clinical trials utilising innovative trial designs.

The Biostatistics Research Group is part of the Institute of Health and Society. The Institute hosts several groups of methodologists, along with a National Institute for Health Research Design Service, and is linked to a UKCRC Registered Clinical Trials Unit. The Biostatistics group currently comprises of 17 statisticians working on a range of applied and methodological projects. Further details are given here.

You will be a suitably qualified statistician (with either a PhD, or a postgraduate qualification with a track record of published research and evidence of being able to conduct statistical methodology research) interested in working on novel statistical methodology and applying it in real trials. The current methodology research interests of the group are adaptive trial designs, biomarker-guided trials, analysis of composite endpoints and stepped-wedge/cluster-randomised clinical trials. There will be opportunities to be involved in the supervision of PhD students and get involved in designing future clinical trials.

Informal enquiries may be made to James Wason via e-mail to james.wason@ncl.ac.uk

The post is available for 3 years. The start date is flexible but ideally would be September 2019.

The Institute of Health & Society is committed to supporting equality and diversity for all staff and students. Applications for part time/flexible working will be considered; please state your desired working arrangements in your application.

The Institute holds a silver Athena SWAN award in addition to the University’s bronze Athena SWAN award in recognition of our good employment practices for the advancement of gender equality, and the University holds the HR Excellence in Research award for our work to support the career development of our researchers. We are also a member of the Euraxess network.

Full details of the post are available at www.ncl.ac.uk/vacancies
