Opening for a statistics intern at Orbital ATK in northern Utah next summer. We are open to a Masters student or someone with a year left on their Bachelors. We will be doing phone interviews next week (Dec. 12 – 16), so I would need students to send me a resume quickly if they are interested. The background is open but the intern will be working with engineers to develop tools for Uncertainty Quantification.

Students can call me if they have questions or e-mail me a resume. Thanks for your help.

Tom Miller
