Business Intelligence Analyst

The BMJ, Euston, London

Apply

Location: London, Euston

Salary: £43,285 – £50,000

We are looking for a Business Intelligence Analyst to lead and develop BMJ’s Business Intelligence service to deliver trusted and effective information to our business stakeholders.

BMJ is a leading healthcare knowledge provider of trusted medical information and services. We are committed to supporting the highest standards of practice in healthcare through our extensive range of products.

We believe our culture and philosophy is what makes us a choice employer. Our people are our most valuable asset. It is their diverse set of skills, personalities and experiences that makes us a great place to work! Work at BMJ and you will be assured of a rewarding role in an innovative and increasingly global organisation.

Using the latest innovations in SAP BusinessObjects and other available tools, you will proactively transform BMJ’s data into meaningful information to promote better decision making and derive value from customer, user, product and sales data.

The ideal candidate will have a proven track record in enabling organisations to leverage the value of Business Intelligence, and be an expert ideally in the application of the SAP BusinessObjects portfolio to provide exceptional Business Intelligence services.

From a technical perspective, you will have strong skills and experience in the following key disciplines:

- Report and analytic development preferably using Web Intelligence
- Storyboard and dashboard development preferably using Lumira Discovery
- Design of analytical content for consumption on mobile devices
- SQL skills for the creation and analysis of SQL statements
- Universe semantic layer design and development
- Data warehouse and relational database modelling concepts
- Provision of technical and functional user support
• Configuration, optimisation and administration of BI platforms, ideally SAP BusinessObjects 4.2

**Equally important is the ability to demonstrate the following experience and analytical skills:**

• Excellent requirements-gathering & analysis skills
• Excellent communication skills and the ability to interact at all levels from Director to line of business
• Provision of thought leadership in the realm of Business Intelligence and the application of BI platforms preferably SAP BusinessObjects
• Experience of 2+ full life-cycle Business Intelligence projects
• Experience of working in an agile framework

This is an exciting opportunity to join an organisation that recognises the true value of data and analytics, and one which is looking to innovate and extend its use of its existing BI platform.

The role offers a unique opportunity to make a significant impact on the organisation’s use of the latest BI capabilities and to play a critical role in the development of our Business Intelligence service.

**BMJ takes pride in its people and is committed to being an equal opportunities employer. We value individuality and therefore welcome all qualified applications from a diverse range of candidates.**

Closing Date: 8th April 2018
