Statistician

Singapore

The Singapore Department of Statistics is the National Statistical Authority responsible for statistics on the Singapore economy and population.

We collect, compile and analyse a wide range of economic, business, household, population, income and expenditure statistics and provide statistical inputs to decision-making agencies in monitoring and developing policies.

Join our team of dynamic and motivated officers in providing objective, high quality and comprehensive statistics and research findings to assist decision-making within government and the community at large. We offer attractive remuneration that will commensurate with educational qualifications, NS and relevant working experience.

Job Description

You will design and develop interactive data visualisations that include dashboards and narrative visualisations. You will also develop and promote best practices for data visualisation design across the public sector. You will need to keep abreast of developments in visualisation design and technologies and apply them to create new innovative and insightful data visualisations.

Job Requirements

- Knowledge or experience in design principles and aesthetics
- Experience working with data visualisation software
- Good communication and presentation skills
- Able to work well both independently and as a member of a team

We regret that only shortlisted applicants will be notified.

Applications close: 06 Oct 2016
