Clinical Outcomes and Research Manager

Monte Nido & Affiliates, one of the leading treatment centers for eating and exercise disorders in the nation, is seeking a full-time Clinical Outcomes and Research Manager to manage a large-scale research program across all our centers nationwide. The successful applicant will work primarily from our South Miami, Florida location.

Position Summary

The Clinical Outcomes and Research Manager will work collaboratively with members of our staff and engage in a variety of research tasks including data collection and management, analysis and presentation of research findings. Applicants should have a strong quantitative foundation and understand the logic of research and purpose of statistical procedures. Applicants must be able to apply appropriate descriptive and inferential statistical procedures based on study design. Additionally, attention to detail, the ability to work alone and in a team setting, and excellent project management and interpersonal skills are needed for this position.

Position Responsibilities

The Clinical Outcomes Research Manager job responsibilities include, but are not limited to:

- Oversee consenting and data collection protocols and ensure consistency and compliance across all sites.
- Maintain, clean and manage multiple, large data sets.
- Conduct data analyses to address key research questions.
- Prepare reports and presentations of the analyses.
- Generate clinically relevant tables and graphs related to research findings.
Input study questionnaires and scoring algorithms into data software and manage questionnaires.

Assist with study design and interpretation of research findings.

Assess areas of improvement in data collection and implement protocols to improve response rate.

Maintain up-to-date licenses for use of research questionnaires and software.

Submit research proposals for IRB approval and concurrent reviews.

Qualifications

- Master’s degree in applied statistics, biostatistics or related quantitative field OR Bachelor’s degree with a Major in Statistics is required.
- Coursework and/or research experience in behavioral sciences is preferred.
- Must be proficient in statistical programming language, such as SPSS or an equivalent program.
- Must be proficient in Microsoft Word, Excel and PowerPoint.
- Must be detail-oriented, organized and conscientious.

To be considered for the position, please submit a cover letter, resume and a list of references to recruitment@montenidoaffiliates.com. While we sincerely appreciate all applications, only candidates selected for interview will be contacted.
