Job Description

Location: Bristol
Pay band 10
Salary: £55,943 - £58,740

This is a full time post

We are seeking a talented, driven and innovative individual, with a positive approach to data systems, data management and data security, to join a supportive, enthusiastic and dedicated team of specialists within the Analytical Services Directorate.
This is a new, exciting opportunity to lead a crucial function at HEFCE/OfS providing strategic oversight of our data and information sources, and our data and analytical infrastructure.

You will be able to demonstrate significant knowledge, experience, and a proven track record of modelling data systems and designing databases, data management in an analytical context, and managing data security and compliance. Ideally you will be fully competent in SAS and SQL, and have significant knowledge of emerging technologies in data management, and relevant data security and data protection regulation.

You will need to have excellent communication, influencing and negotiating skills and the ability to build constructive, sustainable working relationships with a wide range of stakeholders and senior managers.

The closing date for applications is 28th February 2017
Shortlisting: 6th March 2017
Interview: 17th March 2017
