Tenure-track Assistant Professor, Business School, University of Colorado Denver

The Business School at the University of Colorado Denver is seeking a full-time, tenure-track Assistant Professor in Business Analytics.

The Business School at the University of Colorado Denver, located in the heart of downtown, is a hub of innovation, collaboration and discovery. With full AACSB accreditation, it is the largest accredited graduate school of business in the Rocky Mountain region which places it in the top 5 percent of business programs worldwide. The Business School offers outstanding education to more than 3,000 undergraduate and graduate students each year who come from around the world to study in one of its twelve academic disciplines.

The Business Analytics area offers an MS degree in Business Analytics as well as a Business Analytics emphasis in the MBA program. The area is also responsible for courses in statistics and operations management at the undergraduate level.

The position is 40% teaching, 40% research and 20% service. The normal teaching load consists of 4 courses (3 hours each) during a 9-month contract.

Qualifications

Required qualifications include:

- A PhD in Business Analytics, Data Science, Applied Statistics, Operations Research, Computer Science, or a PhD in a field closely related to Business Analytics from an accredited (or equivalent) university
- Potential for excellence in research, resulting in publication in top journals such as those specified in the UT Dallas list of journals.
- Potential for excellence in teaching Business Analytics courses
- At least 3 years’ experience with modern modeling and analysis tools such as R, Database Query languages, Python, Tableau, Matlab, etc.

Preferred qualifications for the position include interests in:

- Understand and navigate the intersection of statistics, computer science, and operations research inherent in Business Analytics, as evidenced by the candidates' statements of career interests
Teaching and researching Business Analytics topics, examples include Predictive Modeling, Large-scale Optimization, Machine Learning, and Decision Analysis.

- Interests in Cloud Computing and Data Management
- At least 1-year experience related to teaching Business Analytics courses (GA, TA, etc.)
- Interests in teaching courses in the core Business programs that would include Business Statistics and/or Operations Management
- Using innovative teaching technologies at both the undergraduate and master's levels. This may include online or hybrid delivery, flipped classrooms, case or discussion methods, and seminar or practicum courses
- The ideal candidate would have an interest in fostering links with the business community or developing new courses and a desire to quickly respond to the changing needs of this dynamic discipline.

Application Materials Instructions:
To apply for this position, please visit https://www.cu.edu/cu-careers and refer to requisition ID: 10914

When applying, applicants must include:

1. A letter of application which specifically addresses the job requirements and outlines qualifications
2. A current Resume/CV
3. The names, addresses, daytime telephone numbers and e-mail addresses for three professional references, either attached to your resume/CV or uploaded as a separate document

Please be advised that the University does check references as part of the employment process. Please do not submit any of your application material (via email) to the job posting contact.

The University of Colorado strongly supports the principle of diversity. We encourage applications from women, ethnic minorities, persons with disabilities and all veterans. The University of Colorado is committed to diversity and equality in education and employment.
