Data Scientist – Insight Services

London, UK

Why is our Worldpay UK Marketing and Partnerships team the next step for you?

The Marketing and Partnerships team has an opening for a Data Scientist on the Insight Services team. If you are looking for an opportunity to make a difference and join Worldpay at this exciting time of our growth, this could be for you.

The Insight Services team is focused on developing new consumer data insights propositions for our corporate customers. We are focused on how we can help our customers make smarter, data-driven decisions by understanding their own shoppers’ behaviour. Worldpay is one of a few companies that can offer this type of data insight to its customers and we believe that there is a broader value-add service we can offer to our corporate customers.

You will be responsible for helping develop and deliver data insight prototypes to our customers. This involves working with the broader data and product teams in the Worldpay UK and Group Technology and Engineering to identify the relevant data and tools needed and also informing the product roadmap for our data and insight portal.

You will report directly into the Head of Insight Services within the UK business. For any Data Scientist interested in data commercialisation, this is an excellent, well-defined remit and opportunity to showcase your creativity to customers!

How will you add value on a day-to-day basis?

You will be responsible for working with the insight managers to develop new data insights proposition. The first use case involves location analytics – you will need to develop the data methodology, algorithms and tools to build a prototype to test with customers. The team will rely on your expertise around efficient and smart ways in working with data. You need to approach every project with a product mindset and work closely with the product team to bring the prototypes to life.

What will make you the ideal candidate?

This role will suit someone who is starting their career as a Data Scientist and wants to learn more about data commercialisation and product development. The goal is to demonstrate how useful Worldpay data is to our customers. This is an excellent opportunity to see your work in action and in the hands of customers.

How is Worldpay changing the world?

We are leaders in modern money. Each and every time you use your debit card or credit card to pay for something, whether online or face-to-face, there’s a good chance it happened because of us. On an annual basis our innovations, systems and technology enable billions of money transactions globally. Working with customers large and small, we help them to take your payments quickly, safely and reliably, allowing them to grow their businesses and making your life more convenient in
the process. As a leader in global fintech and the largest London IPO since 2011, this is a great time to join us in building for the next phase of the Worldpay journey.
