THE BASIC PRACTICE OF STATISTICS

Fifth Edition

Contents

To the Instructor: About This Book

To the Student: Statistical Thinking

PART I: EXPLORING DATA 1

Chapter 1 Picturing Distributions with Graphs xxx

Individuals and variables xxx

Categorical variables: pie charts and bar graphs xxx

Quantitative variables: histograms xxx

Interpreting histograms xxx

Quantitative variables: stemplots xxx

Time plots xxx

Chapter 2 Describing Distributions with Numbers xxx

Measuring center: the mean xxx

Measuring center: the median xxx

Comparing the mean and the median xxx

Measuring spread: the quartiles xxx

The five-number summary and boxplots xxx

Spotting suspected outliers* xxx

Measuring spread: the standard deviation xxx

Choosing measures of center and spread xxx

Using technology xxx

Organizing a statistical problem xxx

Chapter 3 The Normal Distributions xxx

Density curves xxx

Describing density curves xxx

Normal distributions xxx

The 68–95–99.7 rule xxx

The standard Normal distribution xx

Finding Normal proportions xx

Using the standard Normal table xx

Finding a value given a proportion xx

Chapter 4 Scatterplots and Correlation xx

Explanatory and response variables xx

Displaying relationships: scatterplots xx

Interpreting scatterplots xx

Adding categorical variables to scatterplots xx

Measuring linear association: correlation xx

Facts about correlation xxx

Chapter 5 Regression xxx

Regression lines xxx

*Starred material is not required for later parts of the text.

The least-squares regression line xxx

Using technology xxx

Facts about least-squares regression xxx

Residuals xxx

Influential observations xxx

Cautions about correlation and regression xxx

Association does not imply causation xxx

Chapter 6 Two-Way Tables* xxx

Marginal distributions xxx

Conditional distributions xxx

Simpson's paradox xxx

Chapter 7 Exploring Data: Part I Review xxx

Part I summary xxx

Review exercises xxx

Supplementary exercises xxx

PART II: FROM EXPLORATION TO INFERENCE

Chapter 8 Producing Data: Sampling xxx

Population versus sample xxx

How to sample badly xxx

Simple random samples xxx

Inference about the population xxx

Other sampling designs xxx

Cautions about sample surveys xxx

The impact of technology xxx

Chapter 9 Producing Data: Experiments xxx

Observation versus experiment xxx

Subjects, factors, treatments xxx

How to experiment badly xxx

Randomized comparative experiments xxx

The logic of randomized comparative experiments xxx

Cautions about experimentation xxx

Matched pairs and other block designs xxx

Commentary: Data Ethics* xxx

Institutional review boards xxx

Informed consent xxx

Confidentiality xxx

Clinical trials xxx

Behavioral and social science experiments xxx

Chapter 10 Introducing Probability xxx

The idea of probability xxx

The search for randomness* xxx

Probability models xxx

Probability rules xxx

Discrete probability models xxx

Continuous probability models xxx

Random variables xxx

Personal probability* xxx

Chapter 11 Sampling Distributions xxx

Parameters and statistics xxx

Statistical estimation and the law of large numbers xxx

Sampling distributions xxx

The sampling distribution of $\overline{x}$ xxx

The central limit theorem xxx

Chapter 12 General Rules of Probability* xxx

Independence and the multiplication rule xxx

The general addition rule xxx

Conditional probability xxx

The general multiplication rule xxx

Independence again xxx

Tree diagrams xxx

Chapter 13 Binomial Distributions* xxx

The binomial setting and binomial distributions xxx

Binomial distributions in statistical sampling xxx

Binomial probabilities xxx

Using technology xxx

Binomial mean and standard deviation xxx

The Normal approximation to binomial distributions xxx

Chapter 14 Introduction to Inference xxx

The reasoning of statistical estimation xxx

Margin of error and confidence level xxx

Confidence intervals for a population mean xxx

The reasoning of tests of significance xxx

Stating hypotheses xxx

P-value and statistical significance xxx

Tests for a population mean xxx

Significance from a table xxx

Chapter 15 Thinking About Inference xxx

Conditions for inference in practice xxx

How confidence intervals behave xxx

How significance tests behave xxx

Planning studies: sample size for confidence intervals xxx

Planning studies: the power of a statistical test* xxx

Chapter 16 From Exploration to Inference: Part II Review xxx

Part II summary xxx

Review exercises xxx

Supplementary exercises xxx

Optional exercises xxx

PART III: INFERENCE ABOUT VARIABLES

Chapter 17 Inference about a Population Mean xxx

Conditions for inference about a mean xxx

The t distributions xxx

The one-sample t confidence interval xxx

The one-sample t test xxx

Using technology xxx

Matched pairs t procedures xxx

Robustness of t procedures xxx

Chapter 18 Two-Sample Problems xxx

Two-sample problems xxx

Comparing two population means xxx

Two-sample t procedures xxx

Using technology xxx

Robustness again xxx

Details of the t approximation* xxx

Avoid the pooled two-sample t procedures* xxx

Avoid inference about standard deviations* xxx

Chapter 19 Inference about a Population Proportion xxx

The sample proportion $\hat{p}$ xxx

Large-sample confidence intervals for a proportion xxx

Accurate confidence intervals for a proportion xxx

Choosing the sample size xxx

Significance tests for a proportion xxx

Chapter 20 Comparing Two Proportions xxx

Two-sample problems: proportions xxx

The sampling distribution of a difference between proportions xxx

Large-sample confidence intervals for comparing proportions xxx

Using technology xxx

Accurate confidence intervals for comparing proportions xxx

Significance tests for comparing proportions xxx

Chapter 21 Inference about Variables: Part III Review xxx

Part III summary xxx

Review exercises xxx

Supplementary exercises xxx

PART IV: INFERENCE ABOUT RELATIONSHIPS

Chapter 22 Two Categorical Variables: The Chi-Square Test xxx

Two-way tables xxx

The problem of multiple comparisons xxx

Expected counts in two-way tables xxx

The chi-square test statistic xxx

Cell counts required for the chi-square test xxx

Using technology xxx

Uses of the chi-square test xxx

The chi-square distributions xxx

The chi-square test for goodness of fit* xxx

Chapter 23 Inference for Regression xxx

Conditions for regression inference xxx

Estimating the parameters xxx

Using technology xxx

Testing the hypothesis of no linear relationship xxx

Testing lack of correlation xxx

Confidence intervals for the regression slope xxx

Inference about prediction xxx

Checking the conditions for inference xxx

Chapter 24 One-Way Analysis of Variance: Comparing Several Means xxx

Comparing several means xxx

The analysis of variance F test xxx

Using technology xxx

The idea of analysis of variance xxx

Conditions for ANOVA xxx

F distributions and degrees of freedom xxx

Some details of ANOVA* xxx

Notes and Data Sources

Tables

TABLE A Standard Normal probabilities

TABLE B Random digits

TABLE C t distribution critical values

TABLE D Chi-square distribution critical values

TABLE E Critical values of the correlation r

Answers to Selected Exercises

Index

PART V: OPTIONAL COMPANION CHAPTERS

(on the *BPS* CD and online)

Chapter 25 Nonparametric Tests

Comparing two samples: the Wilcoxon rank sum test

The Normal approximation for W

Using technology

What hypotheses does Wilcoxon test?

Dealing with ties in rank tests

Matched pairs: the Wilcoxon signed rank test

The Normal approximation for W^+

Dealing with ties in the signed rank test

Comparing several samples: the Kruskal-Wallis test

Hypotheses and conditions for the Kruskal-Wallis test

The Kruskal-Wallis test statistic

Chapter 26 Statistical Process Control

Processes

Describing processes

The idea of statistical process control

$\overline{x}$ charts for process monitoring

s charts for process monitoring

Using control charts

Setting up control charts

Comments on statistical control

Don't confuse control with capability!

Control charts for sample proportions

Control limits for p charts

Chapter 27 Multiple Regression

Parallel regression lines

Estimating parameters

Using technology

Inference for multiple regression

Interaction

The multiple linear regression model

The woes of regression coefficients

A case study for multiple regression

Inference for regression parameters

Checking the conditions for inference

Chapter 28 More About Analysis of Variance

Beyond one-way ANOVA

Followup analysis: Tukey pairwise multiple comparisons

Followup analysis: contrasts*

Two-way ANOVA: conditions, main effects, and interaction

Inference for two-way ANOVA

Some details of two-way ANOVA*
