

Navigating JMP[®] in Windows

This page gives information on the Windows JMP interface. For information on creating a new data table, opening data tables, and finding help within JMP see the page **Opening JMP and Getting Started**.

The Home Window

- When you first open JMP, you'll see the **Tip of the Day** window.
- You'll also see the new JMP Home Window (to the right), which provides access to:
 - Menus and toolbars (top).
 - Recently used files and help (on the left).
 - All open data tables and windows (on the right). Hover over an item in the list for a preview.
- The JMP Starter, Home Window and other features can be accessed via the **View** menu.

Navigation

- Data tables display thumbnails of open reports (bottom left). Hover over a thumbnail for a preview.
- Each data table and report provides icons (bottom, right corner) to facilitate navigation between windows:
 - ▲ Return to the Home Window (or, click CNTL 1).
 - 📴 Go to the data table.
 - □ ▼ Select to arrange with other windows.

Tips:

- Each window has a JMP menu and toolbar.
- To view a hidden menu click **Alt**, or hover on the report window where the menu would normally appear.
- To have menus and toolbars always display, go to File > Preferences > Windows Specific and change Auto-hide menus and toolbars from Based on window size to Never.
- The JMP Home Window and Tip of the Day appear by default when JMP is opened. To change the default windows, use File > Preferences > General.

Note: For more details, see the book *Using JMP* (under Help > Books).
