

Professor Levine,

I wanted to drop you a personal note beyond the evaluation that I wrote and say THANK YOU for a wonderful semester in your class. Your excellent teaching is an incredible breath of fresh air. You care about your students and about their learning, you adjust your teaching to the level of students' understanding, you use humor in the classroom to make it a pleasant learning environment, test over what you have taught, and are all around a model professor. The experience I had in your class is by far the most positive of any math or statistics class I have had at Purdue during my entire undergraduate and graduate career.

Thank you again for a wonderful semester. Best wishes, and happy holidays!!!

Shawn Jordan
